

PHINIHAS GANDI

Software Engineer | AI/ML Engineer | Full-Stack Developer

Email: phinihasgandi@gmail.com | Phone: +91 7995802047 | Hyderabad, Telangana, India
LinkedIn: linkedin.com/in/phinihas-gandi | GitHub: github.com/Phinihas

PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience at Posidex Technologies, specializing in AI/ML application development, backend engineering, and full-stack development. Strong foundation in software engineering, object-oriented programming, database management, SQL, REST APIs, and problem-solving, with hands-on experience developing enterprise applications and AI-powered solutions. Proven ability to understand business requirements, design and implement reliable solutions, troubleshoot technical issues, and collaborate effectively in a team environment.

WORK EXPERIENCE

Posidex Technologies Hyderabad, Telangana, India
Associate Software Engineer – AI Team Jan 2026 – Present

- PII Extraction Platform: Built multimodal PII extraction for text, PDFs, images, URLs, and audio with entity validation, deduplication, and batch processing using Python, FastAPI, LLMs, GLiNER, Presidio, OCR, FasterWhisper, and ChromaDB.
- PII Database Detection: Built database scanning workflows to identify sensitive information across MySQL, Oracle, SQL Server, and PostgreSQL using LLM-based detection, Regex, Luhn/Verhoeff validation, SQLAlchemy, and FastAPI.
- Multi-PII Masking Platform: Built PII detection and masking workflows for documents and images covering Aadhaar, PAN, Passport, Driving License, Voter ID, phone, account, and card data using OCR, YOLO, FastAPI, MySQL, and Docker.
- AI-Based Signature Verification: Built signature comparison and verification workflows using PyTorch, CLIP, OpenCV, SIFT, ORB, SSIM, and image-processing techniques.

Trainee Associate Software Engineer Jun 2025 – Dec 2025

- Developed software components using Python, Java, Spring Boot, MySQL, SQL, and REST APIs.
- Created synthetic Personally Identifiable Information (PII) datasets and performed image preprocessing and validation using Python, Pillow, and OpenCV for AI/ML projects.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, Nuzvid 2021 – 2025
B.Tech in Computer Science and Engineering | CGPA: 8.05 / 10

Rajiv Gandhi University of Knowledge Technologies, Nuzvid 2019 – 2021
Pre-University Course | CGPA: 9.46 / 10

Z.P. High School, G Vemavaram 2019
Secondary School Certificate (SSC) | CGPA: 10.0 / 10

TECHNICAL SKILLS

- Programming: Python, Java, JavaScript, TypeScript, SQL, C++, C
- AI/ML: LLMs, NLP, GLiNER, OCR, Computer Vision, PyTorch, OpenCV, NumPy, Pandas, CLIP, YOLO, AdaFace
- Backend: FastAPI, Spring Boot, Node.js, Express.js, REST APIs, SQLAlchemy, Presidio, FasterWhisper
- Web & Mobile: React, Next.js, Angular, Flutter, HTML, CSS, Tailwind CSS
- Databases: MySQL, PostgreSQL, MongoDB, ChromaDB, Qdrant, Supabase, Firebase
- DevOps & Tools: Git, GitHub, Docker, Kubernetes, Jenkins, Linux, Windows, Vercel
- Core Concepts: Object-Oriented Programming (OOP), Data Structures, DBMS, API Development

FEATURED PROJECTS

- **Face Matching System (Python, OpenCV, AdaFace, Qdrant, FastAPI, React)**
AI-based face detection and similarity matching using vector search. Achieved 98.15% accuracy and 99.86% ROC-AUC on 6,000 LFW pairs.
- **TripPilot (React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Firebase)**
AI-powered travel planner generating personalized itineraries based on destination, budget, duration, and interests.
- **CarePlus (React.js, TypeScript, Tailwind CSS, Firebase, Node.js, Express.js)**
Full-stack hospital platform with OPD booking, token management, prescriptions, diagnostics, and appointments.
- **CreatorHub (React, TypeScript, Tailwind CSS, Node.js, Express.js, Firebase)**
AI-assisted creator platform for generating video ideas, titles, hooks, descriptions, and scripts.
